

We Always Knew

The Black Heart Procession

We want to know, where truth is found
we try to breathe but life was never found in you
and of that I know

We wander on, beyond the hills
and with what we stole we could never lie with them
and of that we are sure

Life came and forgiveness was gone
was it all to see the light
did you come back from the quest
was it all to see the light in your own dream
you say I guess I knew
I always knew

And what holds you now, will bury you then
and on what you pray you will lie with them
and of that we are sure
we are sure

I try to move but with this heart it's turned so
black
but I would never lie to you
and of that I'm sure

Life came and forgiveness was won
did you come back from the fires
did you come back from your quest
was it all to see the blood was on our hands
and say I guess I knew
I always knew
I guess we knew we always knew
