

## So Tired

## The Butterfly Effect

I'm so fucking tired I can't sleep  
I'm so fucking wired I can't speak  
I'm burning alive I'm so beat  
So god damned drained get off me

Flat on my back on the concrete  
Watching it crash from the front seat  
I've got nothing left I'm empty  
I've had too much for one week

Sideways again there's no slowing down  
Are you high enough?  
Can you see the ground?  
Drinking too much?  
I'll never drown drown  
Bury it again under ground

Tripping again in the bright lights  
Laughing at death coz I'm all right  
I'm somebody else a fist fight  
Do it again tomorrow night

Sad but true  
When everything falls down on you

Fighting a demon you can't see  
He's riding my back like a monkey  
I just can't escape, can't break free  
Fell to my knees I can't breathe

Starring again in the dope show  
The black dogs are barking and I know  
Down to the depths I go  
Will it get better I don't know

Sad but true  
When everything falls down on you  
So sad to see  
The only one standing, is me

I'll keep on wearing you down  
Keeping your head in the clouds  
I'll be the voice screaming loud

I've got the taste for it now  
I'm never coming down

Sad but true  
When everything falls down on you  
So sad to see  
The only one standing, is me

It's alright, the bright lights  
All night to daylight

Sad but true  
When everything falls down on you

It's sad to see  
The only one standing, is me

It's not over now  
It's not over now  
It's not over  
It's not over now  
It's not over now  
It's not over now
