

Siente L'Amour but that is only half of the score
You fucking sangangui so long aufwiedersehn adiu
You had me feeling blue but now I'm gonna jive

I am the sky
Yeh
And it's true

Honey I'm well but the world is a little unwell
Thank you salut but would you help us change and would
you help us through?

Oh my love is so strong
'But love,' she said's 'not all you need'

Yes my mind is open
But so is our disease

The harness is broken
Lord lend me your hand

The sign's clear but not spoken
This is a troubled land

This is a troubled land

Honey I'm well but the world is a little unwell
Thank you salut but would you help us change and would
you help us through?
Honey I'm well but the world is a little unwell
Thank you salut but would you make a change and would
you help us soon?

The tiger and it's coarse
