

# Cloudless

The Daysleepers

in an instant time...  
in an instant time was lost  
and we crystalize

walls of light and sound surround you

and i neutralize...  
and i neutralize this love  
i apologize

i burn through space and time to find you

the dawn breaks through...cloudless skies  
heals a part of you...so cloudless

in an instant i...  
in an instant i found love  
and am purified...

the colors and the sound surround you

and you shine so bright  
so much brighter than the sun  
and i'm mystified

elevate the ground around you
