

One Dance

The Dirty Youth

You said that you were more than just a friend
Then I told you that I loved you
Is that a little too much for you to take?
There's no excuse
When you made it seem so real
I never thought that you would just let go and break

I'm sick of all the words I hear
About the times I held you near
And everything you've said tears us apart
Can't take the love the suffering
The lies the hate stories they spin
It's never gonna change the way you are

One dance turned into a romance
This could be our last chance
We can't let this die
Bright lights shining on us all night
Making this feel so right
We can't let this die

You chime in with words to explain but I don't wanna know
'Cause I've grown
And we've grown apart
Mixed signals all sound the same when there's nowhere to go
I'm no pushover
And we're over now

I'm sick of all the words I hear
About the times I held you near
And everything you've said tears us apart

One dance turned into a romance
This could be our last chance
We can't let this die
Bright lights shining on us all night
Making this feel so right
We can't let this die

Don't speak no no
It's better left alone
'Cause I don't wanna listen
Remember when we touched the sky and

One dance turned into a romance
This could be our last chance
We can't let this die
Bright lights shining on us all night
Making this feel so right
We can't let this die

One dance turned into a romance
This could be our last chance
We can't let this die
Bright lights shining on us all night
Making this feel so right
We can't let this die
