

Temptation

The Dogma

Hey you, don't hide in the dark
Don't run for cover
Don't close your eyes full of tears
But face your future
Cause I'm the only one who really knows your
heart

Don't believe what they say
And together we'll fly away
If you dare .. tonight is your night

I'm the man of your life, I'm your savior
Let your body go with me let your soul go in me
Cause I'm the only one who really knows your soul

Don't believe what they say
And together we'll fly away
If you dare .. tonight is your night

Like a tiger in a cage
Break your chains and win the race
For your love a new begin

The tears in your eyes
Will be dried like the rain by the sun
The thorns of your heart will be picked
Up like a rose from a garden

Pain is the only friend of my life
Darkness will be my guide
My future is sand in an hourglass

Hope is dead within my heart
Joy is a memory too far
Now I only wait for the end?

Don't believe what they say
And together we'll fly away
If you dare .. tonight is your night

Like a tiger in a cage
Break your chains and win the race
For your love a new begin
