

## Forest Fire

The Dream Academy

For short lived cattle grazing land  
With the whole world in their hands  
They're cutting down and burning up the land  
Asset stripping the medicine man  
& all for one  
And every man for himself  
The conflict of interest lies  
Selling off cheap  
Avoid political heat and burn up in a forest fire

And now that there's nothing left  
Just a hole above our heads  
Letting the sunshine in  
That's how the end begins  
With a forest fire

The black cloud rising in the sky  
Up into the atmosphere  
it's bringing down a different kind of weather  
to the one we knew last year  
and  
though it's taking so long to do something about it  
they chip away at it  
bit by bit  
you won't believe anything that grown up for so long  
could be cut down this quick

and now that there's nothing left  
just a hole above our heads  
letting the sunshine in  
that's how the end begins  
with a forest fire

in the corner of a foreign land  
in the wind that blows the sand  
there's the sting of a thousand lies  
that burned up in a forest fire  
we're burning up  
in a clear blue sky  
in a funeral pyre  
in a big white lie  
in a forest fire
