

Can you hear it now, it's not the same
In the final chase you will not be afraid
Will you follow me to a darker place
Where we can find beauty in our embrace
When your hands are cold, but your body's warm
Don't lose your way fighting for our broken cause
We'll lose the world before the dawn
I can't look back, this heart is torn

We're infamous in all our thoughts
We're dangerous behind closed doors
Want you to save your breath so you can breathe with me
With you I'm never lost
We're infamous

So why you looking down
Just when things were looking up
You start to look around
Is it not what you had planned
Is it not good enough
For every reason that you leave and you go on the run
You'll find a reason why

We're infamous in all our thoughts
We're dangerous behind closed doors
Want you to save your breath so you can breathe with me
With you I'm never lost
We're infamous

Can you hear it now, it's not the same
In the final chase, you will not be afraid
Can you hear it now, it's not the same
In the final chase, you will not be afraid

We're infamous in all our thoughts
We're dangerous behind closed doors
Want you to save your breath so you can breathe with me
With you I'm never lost
We're infamous

You know we're infamous, oh
You know we're infamous
