

Chameleon Nights

The Faint

Chameleon-like you see the slithering ones
If you don't blend in you're in danger
Which face saves face it's a slippery slope
And you can't fight back on your own

Hot tongue cold blood our defense is up
Does everyone owe you something?
Lose lose, win win, we're up against the wall
It's that high school, small town talk

I can't face the horror
Can't take the chameleon nights
Blindfold the voyeur
I can't take the chameleon nights

Behind the screen you're on brave attack
You sacrifice to be righteous
Unfriend, unplug there's a world outside
There's a place we see eye to eye

Everybody's talking but we don't know shit
You fight, I fight, it's an ego trip
It's a video game and you're an avatar
What you fake becomes what you are

I can't face the horror
I can't take the chameleon nights
Blindfold the voyeur
I can't take the chameleon nights

I can't face the horror
Can't take the chameleon nights
You fight pain with torture
I can't take the chameleon nights
