

Pull The Strings

The Feelers

It's all for you again
It's in your favourite view again
You pull the strings and make the puppet fly
Your fate can make you die
And it's all for you

And no one told me what you want to hear
It's only time that makes us change
The people round me don't know what to fear
They're petrified of change

Your a wreck no matter what
You come and see that she's the perfect shot
You pull the strings and make her puppet fly
Your fate can make her cry
And it's all for you

And no one told me what you want to hear
It's only time that makes us change
The people round me don't know what to fear
They're petrified of change
Of change
Of change

And no one told me what you want to hear
It's only time that makes us change
The people round me don't know what to fear
They're petrified of change

And no one told me what you want to hear
It's only time that makes us change
The people round me don't know what to fear
They pull the strings for change
Pull the strings for change
