## Connor

**The Feeling** 

You found a way to change the world A simple gift for every boy and girl Always a piece for everyone You showed them all that giving can be fun Giving can be fun

Connor, you've got the life I want Connor, I got it all so wrong You'll never know Connor

You've got the life I want You've got the life I want You've got the life I want Connor

Those poisoned pills, we passed around They made us heavy, pulled us to the ground But you were built from beams of sun Naive and unaffected by a world that's come undone Oh, what can be done?

Connor, you've got the life I want Connor, I got it all so wrong You'll never know Connor

You've got the life I want You've got the life I want You've got the life I want Connor

Connor, you've got the life I want Connor, I got everything wrong You'll never know Connor

You've got the life I want You've got the life I want You've got the life I want Connor
