

Better Way

The Filaments

Can you tell me you'd rather be in this one on one society,
And not in anarchy where we can live for each other not the people that lead?

We know it would be hard to bring down the system.
Look to Seattle and Prague where we had the worlds ears.
And if we stand together they'll start to make changes.
Because we know there must be a better way.

Don't you mind that their profits kill?
Don't you care that they feast on your demise?

People are getting killed, because the states so fucking privatised.

They're bleeding the earth, bleeding it dry.
We can't eat the money for the which our earth soon will die.
But if we stand together they'll start to make changes.
Because we know there must be a better way.

Profit kills when will they see the flaws in our society?
Stately homes built for our Queen when a third of the world has lung disease.
We want justice, we want peace, capitalism on its knees.
Government bows to industry. We say fuck this tyranny!
