

Facing The Wind

The Fixx

Just give me something to hold on
A piece of the world
That won't go wrong
Is there somebody there
I can talk to
Somebody sharing the same view

Facing the wind

One avenue that would lead to
A place on this earth
Where we all grew
Longing for travel we stood still
Watching a sky that was once blue

Facing the wind
Facing the wind
Facing the wind
Facing the wind

Each line we throw gives us false hope
One ray of light, God I can't cope
Thinking about what we all are
One human race that's gone too far

Facing the wind
Facing the wind
Facing the wind
Facing the wind
