

Shadow Woman

The Growlers

Once somebody has it right
It's easier for some
Another someone ain't so bright
It's just the way it comes

She is perched on the streetlight
With a watchful eye
Only follows her own heart
She doesn't even try

Shadow Woman, step into the light
Let me see my stone
Shadow Woman, lead me through the night
Don't ever leave me alone

Standing right behind the shrines
[?] the glow
She can try but she can't hide
Still a part of the show
Sits high on the tightrope
Balanced like a cat

She only comes to me of course
Yeah I like it like that

Shadow Woman, step into the light
Let me see my stone
Shadow Woman, lead me through the night
Don't ever leave me alone

All I want is you
All I know is me
I know you're the truth
Your secret's safe with me

Shadow Woman, step into the light
Let me see my stone
Shadow Woman, lead me through the night
Don't ever leave me alone

Shadow Woman, step into the light
Let me see my stone
Shadow Woman, lead me through the night
Don't ever leave me alone
Don't ever leave me alone
