

Stand Out In The Rain

The Jayhawks

Where you going all alone?
Where you going all alone?
Where you going all alone?
Where you going?

What you gonna do when your time has come?
What you gonna do when your time has come?
What you gonna do when your time has come?
And gone?

Imagine anything
On your own
You'll find different things
On your own

Take me down to the river tonight
And let me stand out in the rain
Take me down to the river tonight
And let me stand out in the rain

Stand out in the rain
Stand out in the rain

Where's the flash from lightning storms?
Where's the flash from lightning storms?
There's the flash from lightning storms
On the ground

There's a kind of freeze that goes deeper down
There's a kind of freeze that goes deeper down
There's a kind of freeze that goes deeper down
And down

What's the matter now
With your sight?
You may disappear
Into the night

Take me down to the river tonight
And let me stand out in the rain
Take me down to the river tonight
And let me stand out in the rain

Stand out in the rain
Stand out in the rain

Where you going all alone?
Where you going all alone?
Where you going all alone?
Where you going?
