## **The Dark Conquest**

**The Kovenant** 

A visitor appears before my eyes A vision where I am king...eternal And in the blackness of night I shall conquer...I shall rise

My eyes they gleam with triumph and glory Many battles I have fought...and won And for centuries have I ruled as king But still the greatest conquest is to come

I will forever seek To dominate the weak Oh...how they shall suffer The anger of my hate But victory shall come... Embrace the dark conquest "Forever winter...forever night..."
