

Come In Come Out

The La's

Anywhere you take it isn't everywhere you see
'Cause if you ace it and you make it
Out if all was meant to be
And could anybody fake it couldn't anybody see
They just come in come out of me
They just come in come out of me

You can't see and you can't touch by
You can never take away
What you've done and what you've made it
Isn't every word you say
And now all that's said is done you come and realize your word
Wouldn't get you out of me

They just come in come out of me

Anywhere you take it isn't everywhere you see
'Cause if you ace it and you make it
Out if all was meant to be
And could anybody fake it couldn't anybody see
They just come in come out of me
They just come in come out of me
