

Leather Together

The Lemon Twigs

Hey baby
Why you try to be like me?
You know nobody can be
Like me

Hey baby
Are you really going out like that?
You know you look like shit with glasses on
You know that

We could be leather together
We could be leather together
If we try, if we try
We could be leather together
We could be leather together
If we try, if we try

One day
With my leather boots
In my leather cap
And my leather cup

You know one day
On a leather beach
With a leather bitch
And leather me, oh we

We could be leather together
We could be leather together
If we try, if we try
We could be leather together
We could be leather together
If we try, if we try

Oh we could be leather together
We could be leather together
If we try, if we try
We could be leather together
We could be leather together
If we try, if we try, baby

Leather queen
Leather me
Riding high
Touch the sky

We could be leather together
We could be leather together
If we try, if we try
We could be leather together
We could be leather together
If we try, if we try

Oh we could be leather together
We could be leather together
If we try, if we try
We could be leather together

We could be leather together
If we try, if we try
