

Count On Me

The Lone Bellow

This world can take you
Need an arm round your neck
Somebody you can talk to

When it shakes you
When no one else will say it
And you need to hear the truth

Let it break you
Let it help you lay down what you held onto

Scared to fail you
Clock is counting down
And I think I got everything to prove
Been a friend of trouble
After losing it all
I've got nothing else to lose

Let it break you
Let it help you lay down what you held onto
Let it break you
You can count on me, I can count on you
To help you lay down what you held onto

Help you lay down what you held onto

Let it break you
Let it help you lay down what you held onto
Let it break you
You can count on me, if I can count on you
Count on me, if I can count on you
Count on me, if I can count on you
Count on me, if I can count on you
Count on me, if I can count on you

Count on me, if I can count on you
(Help you lay down what you held onto)
Count on me, if I can count on you
Count on me, if I can count on you
(Help you lay down what you held onto)
(What you held onto)
