

Dust Settles

The Lone Bellow

We were walking past construction
Waves of heat by the ocean
We all were dripping wet
Looking for a distraction and we
Create our own fiction
For the moment that we live in
And I don't know if I can take it
Guess I'll fake it till I make it

Here we are now
Lonely together
Brothers, sisters
Did we want something better
Tell me how am I gonna find you
How am I gonna find you
When the dust settles

We were running in the Rockies
Where the continent divides
The wind cut through our jackets
And our boots filled up with ice
We were living in the future
On our phones in windowless rooms
And I don't know how we did it
Don't know how it's fair to split it

Here we are now
Lonely together
Brothers, sisters
Did we want something better
Tell me how am I gonna find you
How am I gonna find you
When the dust settles

Wake me up from this fever dream
I didn't hear you 'cause I didn't try to
Wake me up from this fever dream
I've been missing from the land of the living
Wake me up from this fever dream
I didn't hear you 'cause I didn't try to
Wake me up from this fever dream
I've been missing from the land of the living

Here we are now
Lonely together
Brothers, sisters
Did we want something better
Tell me how am I gonna find you
How am I gonna find you
When the dust settles
