

# Give It All Back

## The Material

Give it all back, give it all back to me now  
(Give it all back, give it all back to me now)  
Give it all back, give it all back to me now

You never said goodbye  
You just grabbed your keys and left  
Here in this bed, I slept alone  
You took a part of me  
That wasn't yours to keep  
I need to feel complete again

I never gave you my heart  
You just stole it away  
And if I saw you right now  
I'd know exactly what to say

Give it all back, give it all back to me now  
And pick up my heart that you left there on the ground  
I hope you feel ashamed  
'Cause you're the one to blame  
Give it all back, give it all back to me now

I wasted so much time  
Just staring at the clock  
I thought the pain would stop by now  
But not a day goes by  
That I don't see your face  
I can't seem to erase the past

I never gave you my heart  
You just stole it away  
And if I saw you right now  
I'd know exactly what to say

Give it all back, give it all back to me now  
And pick up my heart that you left there on the ground  
I hope you feel ashamed  
'Cause you're the one to blame  
Give it all back, give it all back to me now

Then one day I just said  
"I can't live life like this"  
And I burned every picture  
All the notes I had saved  
All the lies, page by page  
Became fuel for the fire  
And it's true, I was lost  
But I found my way back  
And I won't let you take that (take that)

Give it all back, give it all back to me now  
And pick up my heart that you left there on the ground  
I hope you feel ashamed  
'Cause you're the one to blame  
Give it all back, give it all back to me now  
Give it all back, give it all back to me now
