

Kingdom Come

The Mission

Desert rat cry me wolf Shedding skin upon you lips I pray For the love of madness for the hand that takes the grip And we close our eyes To forgive and forget And we close our eyes To forgive and forget With bated breath for the kingdom come With bated breath for the kingdom come

I build myself a brave asylum And ask all the madmen to play host And when the colours all fade away It's time for us to give the ghost Give up the ghost

And we close our eyes To dream a while And we close our eyes To dream a while Dream a while With bated breath for the kingdom come With bated breath for the kingdom come

And while we're talking in tongues Of animal behaviour With a flick of the wrist you could've broken my heart And done yourself a favour And I cry in the heat For the promised and given

The hand I once would trust Now for the love of heaven You won't see me See me for dust

And we close our eyes To love again And we close our eyes To love again Love again With bated breath for the kingdom come With bated breath for the kingdom come With bated breath for the kingdom come With bated breath for the kingdom come
