

# Forget About You

The Motors

I've been walking along for a million places  
Places where we used to be  
I've been driving all night in the fog and rain  
Hoping just to see your face

All of your friends they just tell me  
You've gone and you wanna be free  
Now I'm left with those memories  
Forever more

And baby baby baby I just can't

Forget about you  
Now that we're through  
How can I go on  
But baby I just can't

Forget about you  
Now that we're through  
All my dreams are gone  
But baby I'm still thinkin' of you

I've been leaning on you, holdin' you down  
Spending all your time about me  
When you needed my love I was fooling around  
Leaving you to face the shame

If ever you feel you need me  
I'll come runnin' right back to your side  
And I'll know in a wink of the longing I caused

And baby baby baby I just can't

Forget about you  
Now that we're through  
All my dreams are gone  
But baby I just can't

Forget about you  
Now that we're through  
How can I go on  
But baby baby...  
Baby I just can't

Forget about you  
Now that we're through  
How can I go on  
When baby I just can't

Forget about you  
Now that we're through  
All my dreams are gone  
But baby I'm just thinking of you

Forget about you
