

## The Monkey Song

### The Mountain Goats

Cool air falls through the venetian blinds and  
The planets in the heavens are perfectly aligned  
I take in my surroundings  
I memorize them all  
The scuff marks on the stone floor,  
The powder burns on the eastern wall

There's a monkey in the basement  
How did the monkey get there?  
There's a monkey in the basement  
Where did the monkey come from?  
Where did the monkey come from?  
Where did the monkey come from?

The animal noises you used to make  
The andalusian coral snake  
All hail when standing beside this room  
And the heavy hot rains and the sonic boom

There's a monkey in the basement  
Where did the monkey come from?  
There's a monkey in the basement  
How did the monkey get there?  
How did the monkey get there?  
How did the monkey get there?
