

# Givin' n' Takin'

## The Neighbourhood

Talkin' 'bout money?  
Shit, I'm about to make a lot  
See the Rollie on my left wrist?  
It's the reason I don't use a clock  
Check the Rollie once again  
Still I have to for the cops  
And if you hatin' on the low  
Better stand up 'fore your punk arse gets dropped  
I'm a trendsetter  
Tryna make bread like Mayweather  
Comparin' me to other men, I'm way better  
This lamb skin, boy you are fake leather  
I ain't got time for the beef, mothafucka  
Cook it like Boyardee mothafucka  
Everybody wanna be me, see me  
They'll be on my nuts [?], mothafucka  
I just checked and I got next  
I ain't talking alphabet but I'm better with your ex  
You be hangin' with the 6s while I'm bangin' out the 10s  
And I'm from the UK, flow like the River Teign  
So come flow with me  
When I'm sonning all these rappers like an ovary  
And I'm puffin' off a tree with some potent leaves  
Cause we made it from the UK overseas and that's real

It's not givin', it's just takin', it's just takin'  
Live your life, roll your blunts and chase Nathan  
I've been out here for a minute, it's my time  
Bought a watch, key for a crib  
I'm too important, I can't show you where I live  
Why they think they can stop me? I'm goin' so hard  
I'm facin' my fears, face full of tears  
I'm scarred for life, so I'ma ball for life  
DJ play my song tonight, alright  
Russian Roulette, one to the neck  
Break you to pieces and open your flesh  
Am I in love? Am I the best?  
It could be lust, you obsessed with the sex  
I'm obsessed with the thought of me breakin' your heart  
Rollies for breakfast and APs for brunch  
We done got rich and forgot who we was  
I think you would too if you came from the slums  
For life, alright  
Yeah, yeah

Give me the rule, and I'll take it  
I couldn't fake all the things that I say  
I know the rules, but I'm playin'  
In the game that'll throw you away

I'm givin' and takin'  
I'm givin' and takin'  
I'm givin' and takin'  
I'm givin' and takin'  
I'm givin' and takin'
