

Somewhere in the Night

The Oak Ridge Boys

Somewhere in the night
When you're feelin' safe and warm
Don't be surprised to find
It's a calm before the storm
Somewhere in the night
It's gonna hit like lightnin'
It's gonna be so frightnin'
When you find your love is gone

Somewhere in the night
There's a lady lost and lonely
She used to be your one and only
But that was yesterday
Somewhere in the night
There's a new romance unfoldin'
Some lucky stranger's holdin'
What you threw away

You think you'll do alright without her (without her)
You haven't begun to think about her (about her)
But somewhere in the night
It's gonna be over (over) over (over) over (over)

Somewhere in the night
There's a memory right behind you
You can bet it's gonna find you
Wonderin' what went wrong
Somewhere in the night
It's gonna hit like lightnin'
It's gonna be so frightnin'
When you find your love is gone
