

It's You Babe

The Osmonds

explosion
I pick up my sticks and hit my drum
I don't need no tranquilizers
Or running down to Dr. Mizers

If I'm sick it's cause
It's You Babe.

I miss the morning in the evening time
I miss the rain when the day is fine
But there's one thing that I miss most of all
It's you babe

Each night I look into the sky of blue
For each star there's a reason I'm in love with you
If there's someone I'd give my whole life to
It's you babe

I don't light candles in the rain
I don't count clover that's too easy
But when I saw you something down inside me
Told me babe, it was you

Don't let me lose the love I've never shown
Please help me girl, I've been so all alone
If anyone could ever bring me home
It's you babe

I don't light candles in the rain
I don't count clover that's too easy
But when I saw you something down inside me
Told me babe, it was you

Don't let me lose the love I've never shown
Please help me girl, I've been so all alone
If anyone could ever bring me home
It's you babe

If anyone could ever bring me home
It's you babe
It's you babe
It's you babe

Baby, it's you
Baby, it's you
Baby, it's you
Repeat and fade...
