

# That's My Girl

The Osmonds

Take a little love, add a little laughter  
Find a pretty smile, that's my girl  
Take a little rain, turn it into sunshine  
Make you feel better, that's my girl

Just take the time, she'll find the way  
To make you feel at home  
Like you've always known her  
That's my girl

In all the world, there's no one better  
I call out her name, she's always there

If you got a hurt, you're never gonna hide it  
She knows what you're thinking, that's my girl  
Take a look around, counting my blessings  
There's my girl

In all the world, there's no one better  
I call out her name, she's always there

Where do I go and who do I pray for?  
Why am I living? For my girl  
Take me as I am and make me look better  
That's my girl, that's my girl, that's my girl
