

Burning Blue

The Outfield

I don't wanna have to shout while the day is long
Repeating all the things that I've said and done
Only words you know so well

And if I could explain what you want from me
Satisfy your insecurity
Something that you've failed to see

Oh my love for you - well it's still as new
And it's burning blue

I should a known better
Why can't I forget her
She's an operator

I don't wanna have to shout from a mountain top
So try to realize all the things we got
How come you don't understand

There'll never be a future we can trust
Tomorrow's all we need in front of us
One day at a time's enough

And my love for you - well it's still as new
And it's burning blue

I should a known better
Why can't I forget her
She's an operator

An' my love for you - it still feels as new
An' it's burning blue

All across the nation
Open invitation
No exaggeration
I should a known better
Why can't I forget her
She's an operator

An' my love for you - it's still burning blue
