

All Light Up

The Pretty Things

All light up, all light up
All light up, all light up
All light up, all light up
All light up, all light up

Revolution sixty-nine,
I was there, it felt fine

Paris riots, sixty-eight
Dropped a tab and got there late

All light up, all light up

Charlie Manson, drugged on hate
Took the life of fair Sharon Tate

Martin Luther, human rights
Got spurted through the night

All light up, all light up

All light up, all light up
All light up, all light up

Summer concert, high on grass
Never knew it wouldn't last

Watch the kids in Vietnam
Lightin' up for Uncle Sam

All light up, all light up
All light up, all light up

All light up, all light up
All light up, all light up
All light up, all light up
All light up, all light up
All light up, all light up
All light up, all light up
All light up, all light up
All light up, all light up

All light up, light up
All light up, light up
All light up, light up
All light up, light up
