

# The Coast Song

The Rabble

Let's go!

Well woke up in another year  
To burn in silhouette sky will broken  
And fallen trips upon my head  
Then I saw a dozen comes out of their windows  
From a building I broadcast open minds  
Knows who wonder radio did dance  
Oi oi oi

When the sun put to fly your loyal flag  
Try to build up was a nationality  
There's no stars and stripes but silver ferns

But I know  
This is a place  
Where I'm not just a face  
And this part of the world I know call my home  
Oi oi oi

I'm not ever gonna waste my time  
Living life like all the rest  
So here's my toast just for the coast  
Oi oi oi

Sunny beaches and palm trees  
Got a rhythmic diversity  
Yeah my little brother there to me  
And your nines down the road

And you don't bother me  
I won't bother you  
So no never mind what ya heard  
Just come on sing along  
I said come on sing this song because

We're not gonna live  
Our life's like all the rest  
So here's our toast just for the coast  
Oi oi oi

We're not gonna live  
Our life's like all the rest  
So here's our toast just for the coast  
Oi oi oi

(We don't want to (2x))
