The Coast Song

Let's go!

Well woke up in another year To burn in silhouette sky will broken And fallen trips upon my head Then I saw a dozen comes out of their windows From a building I broadcast open minds Knows who wonder radio did dance Oi oi oi

When the sun put to fly your loyal flag Try to build up was a nationality There's no stars and stripes but silver ferns

But I know This is a place Where I'm not just a face And this part of the world I know call my home Oi oi oi

I'm not ever gonna waste my time Living life like all the rest So here's my toast just for the coast Oi oi oi

Sunny beaches and palm trees Got a rhythmic diversity Yeah my little brother there to me And your nines down the road

And you don't bother me I won't bother you So no never mind what ya heard Just come on sing along I said come on sing this song because

We're not gonna live Our life's like all the rest So here's our toast just for the coast Oi oi oi

We're not gonna live Our life's like all the rest So here's our toast just for the coast Oi oi oi

(We don't want to (2x))

The Rabble
