

# Better Off Dead

## The Restarts

Look at the shit we are in  
This planet is a termites nest of seething humanity  
The cancer destroying its host  
Mankind to become a ghost roaming in the ashes

Man devouring man  
Destroying all life that he can  
Hell is the place we are led  
Mankind is better off dead

Evolution is failing  
Not learning from mistakes humans still thrive on war  
The earth is a battlefield  
This hatred we wield is the glitch in our program genetic animosity  
An instinctive hatred for your fellow man  
All that was sacred is gone creating an abyss world we cannot live on.
