

Careful, Kid

The Staves

If you know, then you know
Well, I never really know
And you're coming in strong
But you waited too long

All the kicks in the ribs
They can really make you weak
And I'm coming back 'round
From a five-year rebound

Would you give me one side to go on?

So you cut you're teeth
Before I did
No-one cares
Be careful, kid

Be careful, kid
You're just a kid

Be careful, kid
If you're running in the road
Then you're gonna get
Hit

Well, you think how you think
Even though it does you harm
And it harms me too
Another casualty of you

Would you give me one sign to go on?

So you done your line
You done your bit
You don't care
Be careful, kid

Be careful, kid
Oh
You're just a kid

Be careful, kid
If you're running in the road
Then you're gonna get
Hit

Yeah, you're working on yourself and you're killing it
Leaving all your friends picking up your shit
Standing in the snow with a cigarette
Said you're gonna quit, but you never did
You're leaving, but the show isn't over yet
You're working on yourself and you're killing it
If you're running in the road, then you're gonna get
Hit
