

Burn It Down

The Struts

I'm not even six feet
But I'm the man you won't forget
I'm the one and only virus
That you'll love when you get
Open up your front door bonjour
I'm your getaway car
I could tell you my sign
But I'm already a star

Now before we begin a single thing
We may or may not do
Can I remind you
When I laugh
I'll bring the house down
Or I could burn it down for you

Well It's never too soon to spoon
So come on baby try a little taste
I'll cool you right down baby
If I'm just too hot for your face
I'll be your top hat daddy cat
To dirty to clean
I've got a head full of snow
You know I'm never gonna sleep

Now before we begin a single thing
We may or may not do
Can I remind you
When I laugh
I'll bring the house down
Or I could burn it down for you

A rainbow
Shines through your window
Lighting up your body baby
Your body baby
A rainbow
Shines through your window
Lighting up our bodies baby
Our bodies baby

See it shining baby
Now before we begin a single thing
We may or may not do
Can I remind you
When I laugh
I'll bring the house down
Or I could burn it down for you
Yeah!
I could burn it down

Rainbow
Shines through your window
Lighting up your body baby
Your body baby
A rainbow
Shines through your window

Lighting up our bodies baby
Our bodies baby
