The Summer Set

Just keep me close tonight.
Under the covers,
she said let's make this right.
Cause we're all we'll ever need,
And we got time.

So keep the lights down low Oh oh, you know, you do this to me. So speak up if you feel the way I feel We never love like this

Don't hurry just slow it down now. We got time to make our move Don't hurry just slow it down now. Step back, oh its time we're wasting

Oh oh

You know, the cold night air
It's not the only thing making me shake
We could be anywhere
From LA lights, to Arizona skies
Cause we're all we'll ever need
The two of us on on the silver screen

Stay close, don't forget it, don't forget it You've got me.

So keep the lights down low Oh oh, you know, you do this to me. So speak up if you feel the way I feel We never loved like this

Don't hurry just slow it down now
We got time to make our move
Don't hurry just slow it down now
Step back, oh its time we're wasting

So keep the lights down low Cause this is all we'll ever need So keep the lights down low Oh oh...

Don't hurry just slow it down now
We got time to make our move
Don't hurry just slow it down now
Step back, oh its time we're wasting

Don't hurry just slow it down now
We got time to make our move
Don't hurry just slow it down now
Step back, oh its time we're wasting

(Oh oh)
