

Hold On To Love

The Sunday Drivers

Under the bridges and over the foam,
the sea is awash with the nights starry dome,
and love waits for lovers to dream of its gold
hope is a gift for the loneliest soul

And we all walk together this line
some of us singing the dark and the light
and we all walk together in time
It's cold out- so hold on to love

Sisters and brothers who search for the light,
It's just round the corner, always out of sight.
the rainbows of colours are ending their tune,
I see the future, the future is you

And we all walk together this line
some of us singing the dark and the light
and we all walk together in time
It's cold out- so hold on to love
