

Horror Movie Baby

The Texas Drag Queen Massacre

She's Doctor Jekyll,
And Sister Hyde,
Straight from the lab of Frankenstein,
She's a b-movie monster,
Coming for you,
The sex-crazed creature,
From the Black Lagoon.

She follows Plan 9,
She's from outer space,
She's the devil in disguise,
With the tear away face,
Straight from Horrorwood,
In a Cadillac,
So run away,
And don't you ever look back!

She comes rising from her grave! Whoa!

Horror movie baby,
You're a star and you know its true,
The blood brings out the colour in your eyes and,
Death looks good on you,
Horror movie baby,
They say you died and that's the truth,
The blood brings out the colour in your eyes and,
Death looks good on you.

She's inhuman,
And inhumane,
Stitches on her body,
That she can't explain,
She hopped right out,
Of that UFO,
Where the hell she came from,
Nobody knows.

She was there,
When the earth stood still,
She's like Linda Blair,
And she's dressed to kill,
A man-made monster,
From the silver screen,
A half dead, half eaten,
Killing machine.

She comes rising from her grave! Whoa!

Horror movie baby,
You're a star and you know its true,
The blood brings out the colour in your eyes and,
Death looks good on you,
Horror movie baby,
They say you died and that's the truth,
The blood brings out the colour in your eyes and,
Death looks good on you.

Death looks good on you,
Death looks good on you,
And you look good on me,
You are my horror movie baby!

She comes rising from her grave! Whoa!

Horror movie baby,
You're a star and you know its true,
The blood brings out the colour in your eyes and,
Death looks good on you,
Horror movie baby,
They say you died and that's the truth,
The blood brings out the colour in your eyes and,
Death looks good on you.
