

Lady of the light

The Treatment

You were always the lonely kind
But I can see what's on your mind
Now that girl put a spell on you
I know there's nothing you can do
You thought this was love
She knew so much better
All is not enough
She'll kill you if you let her

Oh, lady of the light
You can take it all
Lady of the light
She will know

All you want is your life to be
Love and sun, a little harmony
Do you feel it burn inside?
Better run, you better hide
See your worlds collide
You thought this was love
Now you're in the gutter
Who will pick you up?
You don't want no other

Oh, lady of the light
You can take it all
Lady of the light
She will know

You were always the lonely kind
But I can see what's on your mind
Now that girl put a spell on you
I know there's nothing you can do

You thought this was love
She knew so much better
All is not enough
She'll kill you if you let her

Oh, lady of the light
You can take it all
Lady of the light
She will know
Oh, lady of the light
You can take it all
Lady of the light
She will know
