

She's Too Much

The Treatment

I never thought it could happen to me
Caught in a trap that I couldn't see
If you're a disease I better get me some shots
Cos you're looking good
I'm coming ready or not
I feel your eyes burn a whole in me
Cos you don't like it that I wanna be free

She's too much
Everything is not enough
She's too much
Better load your guns boys
Take aim now fire
Oh take aim

Do you remember at your Daddy's place
I locked you out boy the look on your face
18 going on 45
But you knew the game you could eat me alive
I can feel your claws digging deep in me
What you're gonna find is a mystery

She's too much
Everything is not enough
She's too much
Better load your guns boys
Take aim now fire
Take aim now fire
Oh take aim

You took me left
You took me right
I couldn't tell if it was daytime or night
I never thought this would happen to me
But you're in a cage and baby I got the key

She's too much
Everything is not enough
She's too much
Better load your guns boys
Take aim

She's too much
Everything is not enough
She's too much
Better load your guns boys
Take aim now fire
Take aim now fire
Oh take aim
