

## Space Baby

## The Tubes

Space baby, you got no planet  
Space baby, you got no planet  
Got no home to give a name  
No air to breathe but just the same  
I dig my atmosphere machine

Space baby, you've been so far  
Unknown face on an unknown star  
The time is now, my life's begun  
I'm burnin' green like a rhomboid sun  
I've never seen a flower grow

It's a mystery to me just how my being  
Came to be and why it came here  
Maybe, I'm not even human but I know  
There's lots of room infinity

There's got to be a time and place  
For me to cease this endless search  
And settle down with my own race  
And never, ever, ever be a space, space baby  
Space, space baby, space, got no planet, space

Space, baby, you've been so far  
Space, baby  
Space, space, space
