

## A Little More Alive

The Twins

We talk a lot together  
And think we'll talk so forever  
Our differences are put under sedation  
We have a light by which we see  
Within our world of secrecy  
Joined in an internal exploration.

We are happy this way  
Let our thoughts carry us away.

I feel a little more alive  
You and me we're drifting with the tide  
I feel a little more alive  
You and me we're drifting side by side.

Of love we never spoke a word  
Somehow it seemed just too absurd  
To interfere with our imagination  
We have a light by which we see  
Within our world of lunacy  
Joined in an internal exploration.

We are happy this way  
Let our thoughts carry us away.

I feel a little more alive  
You and me we're drifting with the tide  
I feel a little more alive  
You and me we're drifting side by side.
