I Fell For You

The Twins

You chased me with persistence
You always knew you'd win
Was only my insistence
That forced you to give in

Night and day – you followed me
You called me on the phone
I never thought – I'd missed your voice
Until you left me alone

And so I fell for you
And don't you say you told me so
Went through hell for you
And don't you say you told me so

And now I'm showing penitence
I'm living in the past
I laughed at your self-confidence
But now you're laughing last

Night and day – you followed me
you called me on the phone
I never thougt – I'd missed your voice
Until you left me alone

And so I fell for you
And don't you say you told me so
Went through hell for you
And don't you say you told me so
