

X-Ray Eyes

The Twins

In a silent night
In a place they call terrific
I couldn't speak a word
When I saw this miracle

She stood there with a smile - but she said nothing to me

Her eyes were gleaming bright
They were sending out a light

She stood there with a smile - but she said nothing to me

A secret weapon she calls her own
I always call it X-Ray Eyes

X-Ray Eyes - A secret weapon has taken my will (repeat)

But she is no sorceress
And she doesn't come from outer space
She is just a girl
And she looks good to me

She stood there with a smile - but she said nothing to me
She's just like all the others
But her eyes are killing me

She stood there with a smile...
