

# Funeral Post

The Used

It's never enough  
You know  
The space you crowd feels bigger  
Apart from the things you won't show

Stay'd stuck in a pose  
You're posin'  
Ya baby  
Metabolize  
The poison if you choke it down slow  
Dug a hole to place a post  
You're pictures on my wall;  
But I cannot remember your face

Though I, I wish you well  
I need you to leave me alone

Better to bide my time and take it slow  
Vetted sick has a face that is calling my name  
Better to bite my lip and say no more  
Because I promise I'll never believe what you promised  
I need you to leave me alone

Take more than enough  
You go

Unpack your shit  
You're making a mess  
It's the coils in the stacks  
With a wrack and the knots in the chords

Stay'd stuck with a rash  
You itch till it's bleeding  
Internalize the noise  
Until it's all that you know  
It's more than a map  
It's a gift from the past

Dig the grave  
The post remains  
I missed the funeral  
But I hope that you had a great show

Though I, I wish you well  
I need you to, need you to leave me alone

Better to bide my time and take it slow  
Vetted sick has a face that is calling my name  
Better to bite my lip and say no more  
Because I promise I'll never believe what you promised  
I need you to leave me alone

Do this:  
Take a breath and hold me  
I can finally recognize myself  
Even if I am invisible

You don't get to ever hold me back  
Accept the roses  
Take it slow  
This is our final curtain call

Better to bide my time and take it slow  
Vetted sick has a face and it's calling my name  
Better to bide my time and take it slow  
Vetted sick has a face that is calling my name  
Better to bite my lip and say no more  
Because I promise I'll never believe what you promised  
I need you to leave me alone
