

# Living Not Alive

The Veer Union

Now I know why, you couldn't breathe  
Locked in a life that you can't leave  
Now I know why you couldn't heal  
Stuck in a world that you can't feel

In silence you are fading  
Crumbling and breaking  
Said that you're mistaken  
But you're numb to what you need  
Can someone rip you open?  
And break what has been broken?  
Before there's nothing left to bleed

You drift into the darkest skies  
I can see the life leave your eyes  
It's buried beneath your crooked grin  
It's fighting to fuel the fire again  
How to lose your hypnotize  
Drowning in the taste of your lies  
The star that would shine, now it dies within  
You're lost in the life that you're living in

And I can see you're living  
But you're not alive

The scars you're creating  
Smiling and Faking  
When will you awaken,  
You succumb to the disease  
Like a whisper in the weather  
Nothing lasts forever

Now I know why, you couldn't breathe  
You're locked in a life that you can't leave  
Now I know why you couldn't heal  
You're stuck in a world that you can't feel

You drift into the darkest skies  
I can see the life leave your eyes  
It's buried beneath your crooked grin  
It's fighting to fuel the fire again  
How to lose your hypnotize  
Drowning in the taste of your lies  
The star that would shine, now it dies within  
You're lost in the life that you're living in

And I can see you're living  
But you're not alive  
But you're not alive

(You're not living!)

You drift into the darkest skies  
I can see the life leave your eyes  
It's buried beneath your crooked grin  
It's fighting to fuel the fire again  
How to lose your hypnotize

Drowning in the taste of your lies  
The star that would shine, now it dies within  
You're lost in the life that you're living in

And I can see you're living (Living!)  
But you're not alive (Living!)  
But you're not alive
