Man into Machine

The Veer Union

We all log into our device
In a land disguised, we're synchronized

But I, I've had enough of this
Satellites, it preys with our life
I feel the price we'll pay

We've lost ourselves
We've lost ourselves
Why have we become
So inhuman

Now and then, I've been hanging by a string
I watch the world change from man into machine
Man into machine
Man into machine
Zeros, ones, is that all we will become?
An empty shell of what was human
Man into machine
Man into machine
We have become so inhuman

Flies will taste our loss
Before we turn to dust
From this chaos
Of emptiness that fills our lungs

Now and then, I've been hanging by a string
I watch the world change from man into machine
Man into machine
Man into machine
Zeros, ones, is that all we will become?
An empty shell of what was human
Man into machine
Man into machine
We have become so inhuman

We have become so inhuman
 (So inhuman!)
We have become so inhuman

Now and then, I've been hanging by a string
I watch the world change from man into machine
Man into machine
Man into machine
Zeros, ones, is that all we will become?
An empty shell of what was human
Man into machine
Man into machine
We have become so inhuman
We've lost our souls
We've lost our souls
