

Show Me Love

The Wanted

But I'll never say it too much
Maybe you did turn to get me
Maybe I'll never know what I done

Now I'm lost in the distance
You looking me like a stranger
Cause how it looks right to me
If you're scared of the danger

I can show you america
All the bright lights in the universe
The cutest reach, the highest heights
A differente place, a different life
Remember that night at the beach's house
For a minute I thought the world was ours
All you had to do was show me love

Yeah it's true you know, we're not perfect
There's a fire inside of me
It means I'll fight for the things that are worth it
If it makes me feel complete
Cause I'm hitting rocks, and I'm taking shots
I'm prepared to lose everything I've got

Now I'm lost in the distance
You looking me like a stranger
Cause how it looks right to me
If you're scared of the danger

I can show you america
All the bright lights in the universe
The cutest reach, the highest heights
A differente place, a different life
Remember that night at the beach's house
For a minute I thought the world was ours
All you had to do was show me love

Show me love, looove
Show me love, looove
Show me love, show me show me love...
Show me show me love...
Show me love

I can show you america
All the bright lights in the universe
The cutest reach, the highest heights
A differente place, a different life
Remember that night at the beach's house
For a minute I thought the world was ours
All you had to do was show me love

All you had to do was show me love
