

Blackout

The Whip

Blackout, blackout We're headed for the blackout (blackout)

It's better when we can't see (can't see) I can see better when
my eyes can rest I push it off my mind

Blackout, blackout I'll see you in the blackout (blackout) There's a place where things are down the line So simple we can shut it off We can break it down

So turn the lights down We're shooting in the dark (2x)

Lights down, in the dark (3x)

I've got to black out that pressure (pressure) I've got to black out that pressure I've got to black out that pressure (pressure, pressure, pressure)

Blackout, blackout We're headed for the blackout (blackout)

We don't even need to make sound (make sound) I feel it more when we cool it down With your feet on the ground

Blackout, blackout I'll see you in the blackout (blackout)

5 minutes in my head space (head space) Get clearer from my dazed state I can communicate

So turn the lights down We're shooting in the dark (2x)

Lights down, in the dark (3x)

I've got to black out that pressure (pressure) I've got to black out that pressure I've got to black out that pressure (pressure, pressure, pressure)

Lights go down head goes up And I feel nothing

I've got to black out that pressure (pressure, pressure, pressure)
