Sweet Sensation

The Whispers

That sweet sensation
Goin' through me
Fizzin' like champagne
You're my sweet sensation
Baby, do me once again

Got a job, it's a living
You do what you gotta do
Punch a clock when the workday's through
But in the dusk of the evening
I wind through the traffic jam
Knowin' soon you'll be showin' me, girl
Who I really am
I go through it all for love
And lovin' makes the man
And I never seem to get enough

Of that sweet sensation
Goin' through me
Fizzin' like champagne
You're my sweet sensation
Ooh, baby, do me once again

Nights are scenes from a movie
Our love changes like your eyes
And each kiss takes me by surprise
Each time is just like the first time
I fall for you once again
I hold tight and you carry me away
To the heart of love
Only you and I can go
It's the art of love
When a girl can make me want her so

It's that sweet sensation
Goin' through me
Fizzin' like champagne
You're my sweet sensation
Ooh, baby, ooh-ooh-ooh...

Sweet, sweet sensation
I go through it all for love
Girl you're so sweet, sensation
And lovin' makes the man

Baby, you're my sweet
I hurry home for that sensation
Nobody gives me such a sweet
Complete, sweet sensation
You know you're my sweet
It's the art of love, sensation
When a girl can make me want her so
You give me that sweet sensation

Now my alarm clock is ringing
The start of another day
Up and out and I'm on my way

But while I work, I'll be dreaming
Of pale lights and soft guitars
Me and you and a thousand stars
Love's celebration calls
We're a sweet sensation the night falls

Sweet sensation
I go through it all for love
Girl, you my sweet sensation
What a feeling
You know you're my sweet

I hurry home for that sensation
'Cause when love's celebration calls
You're so sweet, sweet sensation
Do what you did again
My sweet, my sweet sensation
You showed me who I really am
Lovin' makes the man
Sweet, sweet sensation
Temptation, come and take me
You know you're my sweet sensation, baby
You take me to the heart of love
You're my sweet, celebration, baby...
